E. WOLFF & SONS' newly-invented CRETA LAVIS, or PERMANENT DRAWING CHALKS, in cedar, in every variety of colour.—E. WOLFF and SONS beg to state that they have, by the introduction of great improvements in their CRETA LAVIS, enabled it to be used the same as the ordinary pencils; and effects can now be produced equal to water-colour drawings, without the use of water or any other fluid; the various colours blending together with perfect harmony, beauty, and richness. It can be cut to a fine point, and is thus capable of giving a very delicate outline. For sketching from Nature, the great advantages resulting from the adoption of the CRETA LAVIS must be obvious, as, without the use of water, palette, brushes, &c., all the various tints can be obtained with a truthfulness that cannot be surpassed; and by their compact form may be carried any distance without the slightest inconvenience; thus superseding every other method in general use. The drawings may be carried in a portfolio with safety, as, unlike other crayons, they will neither rub off nor suffer injury by coming in contact with the usual contents of a portfolio. The CRETA LAVIS, unlike the indelible or wax crayons, WILL NOT BE AFFECTED BY HEAT OR CHANGE OF CLIMATE.
E. WOLFF and SONS' IMPROVED CRAYON PAPER is the best for the CRETA LAVIS. To be had of all Artists' Colourmen and respectable Stationers, in leather boxes, containing sets of 12, 18, 24, 36, 48.—A Pattern Card, containing the whole of the shades and colours of the CRETA LAVIS, with their names and numbers attached to each shade, price 1s. each. CAUTION.—As there are several spurious imitations, it is necessary to observe that every Pencil is stamped, "CRETA LAVIS, E. WOLFF and SONS," London, with name of the colour.—Creta Lavis Drawings lent to copy at C. E. CLIFFORD'S, 20, Piccadilly.

THE PIMLICO SLATE WORKS.—Patronized by Royalty, the Heads of the Nobility, the Clergy, Architects of Eminence, Builders, Railway Contractors, and the Public generally.—MAGNUS'S ENAMELLED SLATE, notwithstanding the vile imitations and infringements of his patent that are attempted, continues to grow in favour with the public, being handsomer, more durable, and very much cheaper than marble.—Price lists and a sheet of drawings, sent to any part of the kingdom gratis. Cisterns, Filters, Dairy and Larder Shelves, Wine Cellar Fittings, Slabs, and every variety of plain Slate Work, at prices that defy competition.—Sole and E. Depot Belgrave-place, Pimlico.
Sole Agents for Liverpool—Messrs. RAYNER and BROWN, 64, Lime-street, where an assortment is kept.

FANCY SLATES.—These Slates are cut by an apparatus patented some few months since by Mr. Mathew, one of the partners in the Kirkwhelpington Slate Company, whose slates are known to the market as "the best for quality and twilightness of make. They are cut into various shapes, so that when laid they show themselves as Gothic, diamond, hexagon, rounded, or any other shape, to suit particular fancies or individual taste; whilst, independent of their ornamental appearance, they cover the same space, and form, if possible, a better roof than the common ones, inasmuch as the water is brought to a focus at the point or lower extremity of each slate, and consequently descends with greater rapidity from the roof. These slates are shipped at Portmadoc under the firm of Messrs. MATHEW and SON, and are computed in the freight at somewhat less than the common slates, whilst, from the facility of making them, they are offered at less cost.

RANSOME and PARSONS beg to draw the attention of Architects, Builders, and others, to their PATENT STONE, which in its composition, differs essentially from all other artificial productions for a similar purpose. Flint in character, texture, and appearance, it is made to resemble every kind of natural stone, as regards colour, from the finest marble to the coarsest sandstone, and to possess all their valuable and enduring properties without being liable to any of their defects. It is especially applicable to all kinds of architectural decorations and mouldings, fountains, balustrades for terraces, table tops, &c. &c., and for all external purposes of plain and ornamental finishing. In price it is far below the cost of any natural product, and in many cases can be furnished as low as ordinary cement. Copies of Busts, statuary, or other Works of Art, can be produced in the finest Patent Stone so faithfully as to Plaster of Paris.
IMPORTANT to WATER COMPANIES, MANUFACTURERS, and the PUBLIC.—RANSOME and PARSONS beg to call the attention of Water Companies, Manufacturers, and others to their PATENT STONE FILTERING SLABS, which are capable of filtering from 100 to 200 gallons of water per superficial foot per hour, with a head of water varying from 3 to 6 feet. These slabs can be produced to any required dimensions, and, consequently, can be adapted to any cistern, tank, or reservoir. By a simple precautionary arrangement, they are prevented from being in any way choked or impeded in their action. Price 2s. per superficial foot.—Full descriptions and prices of their other descriptions of filters will be supplied on application.
IMPORTANT to BRICKMAKERS and CONTRACTORS.—RANSOME and PARSONS are also the proprietors of HALL'S PATENT BRICK MAKING MACHINE, capable of moulding 10,000 bricks per day and upwards, which are superior to those manufactured by hand, and are produced at considerably less cost. Communications to be addressed to the Patentees.—Messrs. RANSOME and PARSONS, Flint Wharf, Ipswich; or to 101, Newgate-street, London.
